

Advancing Health

Bold Thinkers

Abt Associates is a leading international designer and implementer of solutions to ensure better health outcomes and stronger health systems, working in collaboration with communities, national ministries, and development agencies. We apply a multidisciplinary lens, drawing on synergistic capabilities in climate change, inclusive economic growth, technology, and governance—because different perspectives lead to more sustainable solutions.

Our comprehensive approach supports the United Nations 2030 Agenda for Sustainable Development, particularly Goal 3—Good Health and Well-Being—as the foundation for thriving societies.

Pursuing Equity. Looking for the Intersections. Driving Real-World Impact.

Abt Associates is a global consulting and research firm that combines evidence and bold thinking to advance equity and innovation in over 60 countries. Since 1965, Abt has partnered with clients and communities to improve the quality of people's lives.

Better Health Outcomes. Stronger Health Systems.

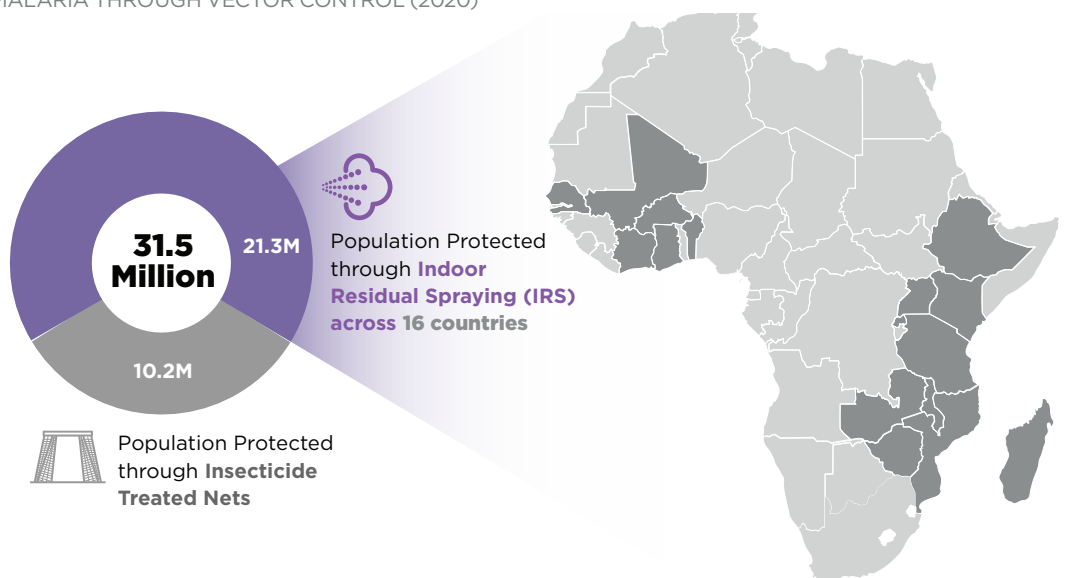

Abt offers in-depth expertise in identifying and addressing global health's most pressing threats, through our economists, health finance experts, epidemiologists, information systems technicians, international operations experts, medical professionals, social and behavioral scientists, program evaluators, and researchers.

Our leading international health projects include:

U.S. President's Malaria Initiative VectorLink Project

Abt is the world's largest implementer of indoor residual spraying, a proven malaria-control measure. Our integrated approach to malaria control—including insecticide-treated nets, entomological research, and agile, data-driven operations across sub-Saharan Africa—protects millions against malaria every year even amid COVID-19 disruptions.

TOTAL POPULATION PROTECTED FROM
MALARIA THROUGH VECTOR CONTROL (2020)

In global health, we specialize in—

- Systems Strengthening
- Global Health Security
- Integrated Service Delivery
- Health Finance
- Private Sector Engagement
- Research, Monitoring, and Evaluation

To deliver results for—

- Malaria
- HIV and AIDS
- COVID-19
- Tuberculosis
- Non-Communicable Diseases
- Maternal and Child Health
- Family Planning and Reproductive Health

USAID Healthy Mother Healthy Baby (HMHB)—Tajikistan

Abt tackles the country's high rates of maternal and child mortality, as well as stunting, wasting, and underweight children with an integrated approach driven by data and continuous learning and adaptation. With digital tools, HMHB is accelerating improved maternal and child health outcomes through activities like tailored messaging, training of thousands of community health workers, and facility assessments.

USAID Local Health System Sustainability Project (LHSS)

Abt implements USAID's global flagship initiative in integrated health systems strengthening. Collaborating with health system partners in low- and middle-income countries, LHSS strengthens local capacity to finance, provide equitable access to, and ensure the quality of essential health care services, including for malaria, COVID-19, and HIV/AIDS.

USAID Efficiencies for Clinical HIV/AIDS Outcomes (ECHO)—Mozambique

Abt supports the Government of Mozambique in achieving treatment for 95 percent of HIV-positive individuals in target provinces, of whom 95 percent will be virally suppressed. ECHO deploys an intensive, data-driven strategy to direct attention where most needed—radically reducing the number of patients previously lost to follow-up—while strengthening crucial laboratory, patient outreach, and information systems.

Quick Facts

Founded 1965

Kathleen Flanagan
President & CEO
